Correction to: Assessment of burnout in veterinary medical students using the Maslach burnout inventory-educational survey: a survey during two semesters

Munashe Chigerwe^{1*}, Karen A. Boudreaux² and Jan E. Ilkiw³

Correction to: BMC Med Educ

<http://www.biomedcentral.com/1472-6920/14/255>

Following publication of the original article [1], we've been notified by an author that they have published their manuscript without seeking permission for the survey that was included in one of their tables (Table 1).

Table 1 to be obscure. The legend to be replaced by the following text:

Summary of the 22-item factor analysis loadings for the MBI-ES in veterinary medical students ($N = 170$). This table been removed because the authors have not obtained permission to reproduce the Maslach Burnout Inventory Educator Survey (MBI-ES). The results presented in this table are available by contacting the authors.
